Current

2004            **CPR**

**Publications:**

1994            **Diabetes and Your Feet, Health-Health and wellness journal from**

Sharp Health Care, winter 1994

1991 **Epidural Morphine as an adjuvant to the treatment of Pain in a Patient with Acute Inflammatory Radiculopathy Secondary to Guillain-Barre Syndrome**, *The Journal of Foot Surgery*, VOLUME 30, NUMBER 3, 1991

**Principal Investigator Experience in Clinical and Research Studies:**

**2009- HP-828-101**

**Purpose**

To compare HP-828-101 to standard of care for the management of partial thickness wounds, evaluated using the Bates Jensen Wound Assessment Tool (BWAT).

Secondary objectives are comparison of the proportion of subjects with the wound closure by day 22, comparison of pain assessed using a VAS, and evaluation of moist wound environment as per the BWAT

**Study Design:**

Wounds will be limited to one or two common types which are seen in facilities familiar with clinical research.

A comparator approach for each wound type, so that **HP-828-101** can be evaluated against current standards of wound care.

**2008-2009 MATRIX:** A Phase 2b Study of GAM501 in the Treatment of Diabetic foot ulcers in the lower extremities.

**Purpose**

The Phase 2b MATRIX research study will study the effects of Exellarate™ (GAM501) (Ad5PDGF-B/bovine Type I collagen gel) in men and women for the potential treatment of neuropathic non-healing diabetic foot ulcers. GAM501 is an investigational product designed to stimulate the process of wound healing.

**Study Design**

The MATRIX research study is a randomized, double-blind, placebo-controlled, comparator arm (Standard of Care) safety and efficacy study to evaluate GAM501 (Ad5PDGF-B/bovine type I collagen gel) that is topically administered once or twice over the course of the study.

**2006-2007**    **3M Study on Tegaderm-AG Mesh**-study patients with chronic diabetic foot ulcers response to silver dressings.

**Updated 12/2009**
